Practice workbook · How the brain develops before birth

Forebrain, midbrain, hindbrain, cerebellum and medulla in early development.

4 question parts: 1 worked-example retry and 3 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

3. Question 3 · part whole · 2 marks

2022 JUN · Paper 01

Further practice · Attempt part whole only.

DO NOT WRITE IN THIS AREA

3 Finlay is a boy who was born with a healthy brain. He likes to dance and run around. His mother has two other children who like to chase Finlay. When he was 18 months old, Finlay fell out of his cot bed in his bedroom and banged his head. He was taken to hospital where they discovered that he had damaged his medulla.

Explain **one** way that Finlay could be affected by the damage to his medulla.

You should refer to the role of the medulla in your answer.

(Total for Question 3 = 2 marks)
