Practice workbook · Issues and debates essays (9 marks)

Paper 1 Section F essays on a named issue or debate from the compulsory topics: morality, reductionism/holism, nature/nurture, change over time, social and cultural issues.

7 question parts: 1 worked-example retry and 6 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

2025 JUN · Paper 01

Worked-example retry · Attempt part whole only.

***22** Depression is a common mental health issue. Researchers have identified that both nature and nurture factors are involved in how it is caused.

As an individual, the symptoms and treatment of depression can affect the ability to cope, from completing basic day-to-day activities to employment. It can also put a strain on family relationships.

In wider society, depression can have an impact on many different areas including employment, health services, emergency services and public funding.

Assess the importance of whether depression is caused by nature or nurture factors.

***24** A woman needs money to help her brother but does not have enough to help him. She steals money from her workplace and gives it to her brother.

Three men from England were asked whether the woman's actions were right or wrong and why.

- Man A said the woman was right to steal the money because everyone in the world is equal and so money should be given to those who need it.
- Man B said the woman was wrong to steal the money because she might get in trouble.
- Man C said the woman was right to steal the money because her family might disapprove of her not helping her brother.

Assess how stages of morality can account for the responses given by the men.

***22** Amir was given a popular computer video game and console for his birthday. He began playing at the weekends with his friends but quickly wanted to play it more and also online.

Amir is now playing the game during the week and into the night. He has even said he is unwell when he was not so that he could have time off school to continue playing the game.

Amir has recently been diagnosed with addiction.

Assess the possible contribution of both nature and nurture for Amir's addiction to his computer video game.

2021 NOV · Paper 01

Further practice · Attempt part whole only.

***25** Lauren's 16th birthday was a month ago. She had a birthday party with her friends. At the party Lauren wore a purple t-shirt and jeans and had a unicorn bracelet on her wrist. During the party she danced with her friends and had a cake that was the shape of a horse.

Lauren's friend has recently recalled the birthday party and believed Lauren wore a purple dress, a horse bracelet and that the cake was the shape of a unicorn.

Assess how far memory can be considered reductionist with reference to Lauren's friend's memory of the birthday party.

2022 JUN · Paper 01

Further practice · Attempt part whole only.

***27** After conflicts such as the First or Second World Wars, victims were left with damaged brains. Soldiers who returned home with damaged brains found their level of functioning was impaired. Some also returned home suffering from psychological problems.

Case studies of brain-damaged patients have helped researchers to study the brain and from this they have attempted to propose how the structure and function of the brain affect human behaviour and processing.

Damage to a specific brain area can lead to theories about the function of that region, which may change over time as greater knowledge is amassed through research using improved technology.

Assess how psychological understanding of the brain has changed over time.

2023 JUN · Paper 01

Further practice · Attempt part whole only.

***22** Major atrocities can reveal the most aggressive side of human behaviour.

Death and destruction during war and the purposeful killing of other humans have been studied in psychology to try to discover the potential causes of these acts.

Unearthing the causes of such acts may enable them to be prevented in the future.

Stanley Milgram conducted a series of experiments to study obedience to authority. Other researchers in psychology have investigated crowd behaviour, conformity, and the bystander effect. Research, such as this, has enabled psychologists to understand ways to prevent blind obedience, and the social and cultural issues in psychology.

Assess social and cultural issues in psychology.

7. Question 26 · part whole · 9 marks

2024 JUN · Paper 01

Further practice · Attempt part whole only.

***26** Declan is researching human memory. He recruited a selection of volunteers with amnesia and a selection of volunteers without amnesia to participate in an investigation assessing their memory.

The volunteers were asked questions about public events that happened during their lifetime. They were asked to answer 90 questions using a multiple-choice format, where the number of correct responses were recorded.

Later, the volunteers were shown 100 photographs of people and asked to respond 'yes' or 'no' to whether the photograph showed a certain celebrity. For example, 'Is this person Barack Obama?' Half of the time the correct answer was 'yes'. Their score for the test was recorded.

Declan carried out data analysis for the two memory tasks to see whether there was a difference between the memory of those with amnesia compared to those without amnesia.

Assess how far research into memory, such as Declan's investigation, could be considered reductionist.
