Practice workbook · Young (2007): CBT for internet addiction

Young (2007) study of CBT with internet addicts: context, procedure, findings and evaluation.

9 question parts: 1 worked-example retry and 8 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

1. Question 15 · part b · 4 marks

2024 JUN · Paper 01

Worked-example retry · Attempt part b only.

15 Henrietta is a 19-year-old female who has been diagnosed as addicted to gambling. She began gambling when at a casino on holiday but continued to gamble more frequently when she returned home. Henrietta began visiting the casino every weekend, but she now visits every day. She bets large amounts of money and frequently loses, and she now owes a lot of money to her bank.

Henrietta has visited a clinical psychologist who has said they will help her using cognitive behavioural therapy (CBT).

(a) Explain how the clinical psychologist could measure whether cognitive behavioural therapy (CBT) is helpful for Henrietta's addiction.

You should refer to Young (2007) in your answer.

3. Question 9 · part a · 1 mark

2020 NOV · Paper 01

Further practice · Attempt part a only.

9 Young (2007) conducted a study into internet addiction.

(a) Identify the country in which Young (2007) carried out her study.

(1)

- ☒ **A** UK
- ☒ **B** Australia
- ☒ **C** Canada
- ☒ **D** USA

(b) Participants were given client outcome questionnaires after the 3rd, 8th and 12th online sessions and a follow-up questionnaire at a later date in Young's (2007) study.

Identify how long after the 12th online session the follow-up questionnaire was given to the participants.

(1)

- ☒ **A** 1 month
- ☒ **B** 3 months
- ☒ **C** 6 months
- ☒ **D** 12 months

6. Question 14 · part b · 2 marks

2021 NOV · Paper 01

Further practice · Attempt part b only.

14 Aliyah's family all have mobile phones. Her mother and father frequently use their mobile phones when Aliyah is in the room. Aliyah's older sister never seems to put her mobile phone down.

Aliyah was recently given a mobile phone for her 12th birthday and gets very anxious and upset when she cannot find it. She is always checking her Instagram and cannot think clearly if her mobile phone is not in direct sight at all times.

Aliyah has been losing sleep to continue checking her Twitter page throughout the night and feels happy whenever she receives a message from her followers.

Aliyah has recently been diagnosed with addiction.

(a) Explain how learning theory could account for Aliyah's addiction.

(2)

(b) Aliyah has been asked to attend cognitive behaviour therapy (CBT) in an attempt to treat her addiction.

Explain how effective CBT is likely to be for Aliyah's addiction.

You should refer to Young (2007) in your answer.

10 Identify **two** findings from Young (2007).

- ☒ **A** After session 12, the highest mean rating for how helpful clients found the sessions was for 'relationship function'.
- ☒ **B** The most problematic online application reported by men was shopping.
- ☒ **C** The main problem associated with compulsive internet use was time.
- ☒ **D** Most clients showed continuous improvement to their symptoms by session 3.
- ☒ **E** At the 6-month follow-up, mean ratings for how helpful clients found the sessions for all outcome goals had increased.
