Type MS · Finding the mode

Answer 1 of 5 · Question 4 part a · 1 mark

2025 JUN · Paper 02 · extract 1 of 2 · find part a in this mark scheme extract

Question Number	Answer	Mark
4(a)	**One** mark for correct calculation of the mode before the ban. • 7 Reject all other answers.	**(1)**

Question Number	Answer	Mark
4(b)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. For example: • Putting in place an unhealthy food ban leads to a more negative attitude towards eating unhealthy food (1), as ratings are at least two points lower for all participants after the ban (1). Accept any other appropriate response.	**(2)**

Question Number	Answer	Mark
4(c)	**One** mark for accurate definition of qualitative data. **One** mark for suitable example of qualitative data. For example: • Qualitative data is non-numerical/descriptive data which allows researchers to explore a topic in more depth (1). For example, using open questions to gather opinions on a specific topic area (1). Accept any other appropriate response.	**(2)**

Type MS · Finding the mode

Answer 2 of 5 · Question 4 part whole · 1 mark

2021 NOV · Paper 02 · extract 1 of 2 · find part whole in this mark scheme extract

Question number	Answer	Mark
4	**One** mark for stating how to find the mode For example; • You would find the data point that occurs the most often in the set of data you have gathered (1). Accept any other appropriate response.	**(1)**

Type MS · Finding the mode

Answer 2 of 5 · Question 4 part whole · 1 mark

2021 NOV · Paper 02 · extract 2 of 2 · find part whole in this mark scheme extract

Type MS · Finding the mode

Answer 3 of 5 · Question 3 part d · 1 mark

2022 JUN · Paper 02 · extract 1 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
3(a)	**One** mark for correct knowledge of a structured interview. • A structured interview is when a researcher has predetermined questions that they ask interviewees (1). Accept any other appropriate response.	(1)

Type MS · Finding the mode

Answer 3 of 5 · Question 3 part d · 1 mark

2022 JUN · Paper 02 · extract 2 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
3(b)	**One** mark for understanding of sampling method. **One** mark for application to the scenario. For example: • A random sample is when the participants in a target group all have an equal chance of selection (1), so Juliet could put the names of the available 17-year-old students into a hat and pick out her participant sample (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
3(c)	**One** mark for accurate identification of the type of data. For example: • Juliet gathered primary data directly from the 17-year old students (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(d)	**One** mark for correct calculation of the mode for body image scores. • 7 (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(e)	**One** mark for giving one way the findings support the conclusion. For example: • As the number of hours spent on social media increased the scores for body image decreased (1). Accept any other appropriate response.	(1)

Type MS · Finding the mode

Answer 3 of 5 · Question 3 part d · 1 mark

2022 JUN · Paper 02 · extract 3 of 3 · find part d in this mark scheme extract

Type MS · Finding the mode

Answer 4 of 5 · Question 3 part c · 1 mark

2023 JUN · Paper 02 · extract 1 of 2 · find part c in this mark scheme extract

Question number	Answer	Mark
3(a)	**One** mark for correct calculation of participants recalling nine objects as a fraction of all participants. • $\frac{2}{10}$ simplified 2/2 and 10/2 = $\frac{1}{5}$ (1) Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(b)	**One** mark for correct rank ordering. **One** mark for correct answer. • Rank ordering: 6, 7, 8, 8, 8, 9, 9, 10, 10, 11 • (8+9)/2 = 8.5 Accept any other appropriate response.	(2)

Question number	Answer	Mark
3(c)	**One** mark for correct calculation of the mode. • 8 (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(d)	**One** mark for understanding how to calculate a mean score. • He would add together all the scores and divide that total by the number of participants (1). Accept any other appropriate response.	(1)

Type MS · Finding the mode

Answer 4 of 5 · Question 3 part c · 1 mark

2023 JUN · Paper 02 · extract 2 of 2 · find part c in this mark scheme extract

Type MS · Finding the mode

Answer 5 of 5 · Question 5 part d · 1 mark

2024 JUN · Paper 02 · extract 1 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
5(a)	**One** mark for correct knowledge of a case study. • A case study is in-depth research often undertaken with a single person that collects a range of data using different methods (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
5(b)	**One** mark for correct knowledge of quantitative data. **One** mark for an appropriate example from the scenario. • Quantitative data is data that can be counted or measured numerically (1), such as measuring the alcohol consumed by the patient each week in units (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
5(c)	**One** mark for an appropriate estimation. 300 - 60 • 240 Accept any other appropriate response.	(1)

Question number	Answer	Mark
5(d)	**One** mark for correct calculation of the mode for units of alcohol consumed. • 79 (1). Reject all other answers.	(1)

Type MS · Finding the mode

Answer 5 of 5 · Question 5 part d · 1 mark

2024 JUN · Paper 02 · extract 2 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
5(e)	**One** mark for correct rank ordering. **One** mark for correct answer. • Rank ordering: 34 45 63 70 72 77 79 79 • (70+72)/2 = 71 Accept any other appropriate response.	(2)

Question number	Answer	Mark
5(f)	**One** mark for accurately giving 12.81924 to two decimal places. For example; • 12.82 (1). Reject all other answers.	(1)
