Type MS · Reductionism and holism

Answer 1 of 3 · Question 5 part whole · 2 marks

2025 JUN · Paper 01 · find part whole in this mark scheme extract

Question number	Answer	Mark
5	**One** mark for accurate definition. **One** mark for an appropriate example. For example: • Reductionism is the process of explaining complex psychological phenomenon into smaller units which make it up (1). For example, if memory is explained using simple units such as the sensory register, short-term and long-term memory (1). Accept any other appropriate response.	**(2)**

Type MS · Reductionism and holism

Answer 2 of 3 · Question 6 part whole · 2 marks

2019 JUN · Paper 01 · extract 1 of 2 · find part whole in this mark scheme extract

Question number	Answer	Mark
6	Up to **two** marks for description. For example: • Reductionism is a way of explaining complex phenomenon in terms of smaller units which make it up whereas holism is not (1) because holism considers that the smaller units never add up to the whole due to the relationship between the units (1). Accept any other appropriate response.	**(2)**
