Type MS · Drug treatments for depression and addiction

Answer 1 of 5 · Question 13 part b · 4 marks

2022 JUN · Paper 01 · extract 1 of 2 · find part b in this mark scheme extract

Question number	Answer	Mark
13(a)	**One** mark for accurate understanding of drugs for addiction. **One** mark for exemplification of how drugs for addiction can be used to explain the scenario. For example: • If Claire is taking alcohol, she could take drugs, such as disulfiram (Antabuse), which can cause sickness if alcohol is consumed after taking it (1), so by taking this drug Claire would associate sickness with alcohol and avoid drinking alcohol (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
13(b)	**One** mark for identification of each weakness (maximum **two** marks). **One** mark for justification, which must be linked to each weakness identified (maximum **two** marks). For example: Weakness one • Claire could stop taking the drugs given for her addiction which means cravings would come back and she would relapse (1) so taking drugs may only be effective if Claire is motivated to quit using the drug as it would require willpower and determination to continue using the medication and avoid the drug (1). Weakness two • Some drugs prescribed for drug addiction can be highly addictive and dangerous substances so Claire may replace addiction for one drug for another drug (1) which could lead to further health problems and potential harmful effects of the new drug she has been prescribed to overcome drug addiction which means her problems have not been fully resolved by taking drugs (1). Accept any other appropriate response.	(4)

Answer 1 of 5 · Question 13 part b · 4 marks

2022 JUN · Paper 01 · extract 2 of 2 · find part b in this mark scheme extract

Type MS · Drug treatments for depression and addiction

Answer 2 of 5 · Question 11 part c · 2 marks

2019 JUN · Paper 01 · extract 1 of 3 · find part c in this mark scheme extract

Question number	Answer	Mark
11(a)	**One** mark for correctly stating one aspect of 'nature'. For example: • His father also had depression so it could have been genetically inherited (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
11(b)	**One** mark for correctly stating one aspect of 'nurture'. For example: • His mother has been diagnosed with a life-threatening illness which would be a stressful life event (1). Accept any other appropriate response.	(1)

Type MS · Drug treatments for depression and addiction

Answer 2 of 5 · Question 11 part c · 2 marks

2019 JUN · Paper 01 · extract 2 of 3 · find part c in this mark scheme extract

Question number	Answer	Mark
11(c)	**One** mark for demonstrating accurate understanding of the use of drugs as a treatment for depression. **One** mark for exemplification of how drugs could be used as a treatment to help Shaun. For example: • Antidepressants, such as an SSRI, can work to increase serotonin in the brain (1) so this may improve Shaun's motivation and mood so he is able to get out of bed more easily and go to work (1). Accept any other appropriate response.	**(2)**

Question number	Answer	Mark
11(d)	**One** mark for identification of each strength/weakness (maximum **two** marks). **One** mark for justification which must be linked to the strength/weakness identified (maximum **two** marks). For example: Strength • Drug treatments for depression have experimental support and have been shown to help alleviate symptoms compared to a placebo so should help Shaun (1), which was shown by Geddes et al. (2003) who found relapse of 41% for a placebo compared to 18% for those taking antidepressants (1). Weakness • Antidepressants can be criticised for being a short-term measure so may not help Shaun in the long-term (1) because once he stops taking the antidepressants the symptoms are likely to return so the drugs have not treated his condition (1). Accept any other appropriate response.	**(4)**

Type MS · Drug treatments for depression and addiction

Answer 5 of 5 · Question 11 part whole · 2 marks

2025 JUN · Paper 01 · extract 1 of 2 · find part whole in this mark scheme extract

Question number	Answer	Mark
11	Up to **two** marks for description. For example: • Antidepressants, such as an SSRI, can be used to increase serotonin at the synapse (1). The SSRI drug would prevent reuptake of the serotonin so more would stimulate the post-synaptic receptor sites and attempt to rebalance neurochemistry (1). • Antidepressants, such as Tricyclics, can be used to increase serotonin and noradrenaline at the synapse (1). The TCA drug would prevent reuptake of the serotonin and noradrenaline so more would stimulate the post-synaptic receptor sites and attempt to rebalance neurochemistry (1). Accept any other appropriate response.	**(2)**
