Type MS · Sleep stages, REM and why sleep matters

Answer 3 of 4 · Question 32 part whole · 2 marks

2021 NOV · Paper 02 · extract 1 of 2 · find part whole in this mark scheme extract

Question number	Answer	Mark
32	**One** mark for accurate understanding of REM sleep. **One** mark for exemplification of how REM sleep can be used to explain the scenario. For example: • Rapid eye movement (REM) sleep is a phase of sleep which paralyses the muscles of the body, the eyes move and the pulse quickens (1), so the eye movement of the participant could indicate to Izzy that the participant has increased brain activity which is when dreaming is said to occur (1). Accept any other appropriate response.	**(2)**
