Type MS · Three mountains task (Piaget and Inhelder, 1956)

Answer 1 of 6 · Question 5 part a · 2 marks

2024 JUN · Paper 01 · extract 1 of 2 · find part a in this mark scheme extract

Question number	Answer	Mark
5(a)	**One** mark for appropriate conclusion. **One** mark for justification of the conclusion through analysis/interpretation. For example: • The ability to decentre and see the world from others' perspectives appears to have been developed by 10 years old (1). This is shown by 27/30 of the 10 year olds saying the rectangular building would have been at the front for the person on the opposite side of town which is not what they could personally see (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
5(b)	**One** mark for identification of a relevant improvement. **One** mark for justification, which must be linked to the improvement identified. For example: • The investigation about the placement of the buildings could have been carried out in different schools, in a variety of areas across the country and not just the local school (1) which would give a wider variety of pupils of 6,8,10 years old so the findings regarding the set of buildings and how egocentric the children were could be more representative of all children of those ages from that country (1). Accept any other appropriate response.	(2)

Type MS · Three mountains task (Piaget and Inhelder, 1956)

Section B
Memory – How does your memory work?

Type MS · Three mountains task (Piaget and Inhelder, 1956)

Answer 2 of 6 · Question 1 part a · 1 mark

2019 JUN · Paper 01 · find part a in this mark scheme extract

Question number	Answer	Mark
1(a)	**C** 10 **The only correct answer is** C **A** is not correct because there were not 8 20 x 28cm pictures **B** is not correct because there were not 9 20 x 28cm pictures **D** is not correct because there were not 11 20 x 28cm pictures	(1)

Question number	Answer	Mark
1(b)	**B** 100 **The only correct answer is** B **A** is not correct because there were not 90 participants **C** is not correct because there were not 110 participants **D** is not correct because there were not 120 participants	(1)

Type MS · Three mountains task (Piaget and Inhelder, 1956)

Answer 3 of 6 · Question 1 part b · 1 mark

2019 JUN · Paper 01 · find part b in this mark scheme extract

Question number	Answer	Mark
1(a)	**C** 10 **The only correct answer is** C **A** is not correct because there were not 8 20 x 28cm pictures **B** is not correct because there were not 9 20 x 28cm pictures **D** is not correct because there were not 11 20 x 28cm pictures	(1)

Question number	Answer	Mark
1(b)	**B** 100 **The only correct answer is** B **A** is not correct because there were not 90 participants **C** is not correct because there were not 110 participants **D** is not correct because there were not 120 participants	(1)

Type MS · Three mountains task (Piaget and Inhelder, 1956)

Answer 4 of 6 · Question 3 part a · 2 marks

2020 NOV · Paper 01 · extract 1 of 2 · find part a in this mark scheme extract

Question number	Answer	Mark
3(a)	**One** mark for demonstrating accurate understanding of Piaget and Inhelder's (1956) Three Mountains task. **One** mark for exemplification of how the study can be used to explain the scenario. For example: • Piaget and Inhelder (1956) reported that children who could not see the mountains from the doll's perspective were considered egocentric (1) and Sarah's daughter does not appear to be able to see the playground from the toy robot's perspective so she must be in the pre-operational stage (1). Accept any other appropriate response.	**(2)**

Answer 4 of 6 · Question 3 part a · 2 marks

2020 NOV · Paper 01 · extract 2 of 2 · find part a in this mark scheme extract

Question number	Answer	Mark
3(b)	**One** mark for identification of each strength / weakness (maximum **two** marks). **One** mark for justification which must be linked to the strength / weakness identified (maximum **two** marks). For example: Strength • Sarah's study took place in a real playground setting so it has high ecological validity (1) because her daughter would be more likely to act naturally when giving her perspective of what the toy robot could see as it was a real life setting (1). Weakness • The task of asking her daughter what the toy robot could see lacks mundane realism (1) because this is not a normal thing to ask a child who would be playing in a playground so the findings may lack validity (1). Accept any other appropriate response.	(4)

Type MS · Three mountains task (Piaget and Inhelder, 1956)

Answer 5 of 6 · Question 2 part a · 1 mark

2024 JUN · Paper 01 · find part a in this mark scheme extract

Question number	Answer	Mark
2(a)	**C** – Three The only correct answer is C. A is incorrect because it was not one. B is incorrect because it was not two. D is incorrect because it was not four.	(1)

Question number	Answer	Mark
2(b)	**D** - 33 The only correct answer is D. A is incorrect because it was not 16. B is incorrect because it was not 21. C is incorrect because it was not 30.	(1)
