Type MS · Peterson and Peterson (1959): how long STM lasts

Answer 1 of 7 · Question 8 part a · 2 marks

2020 NOV · Paper 01 · extract 1 of 3 · find part a in this mark scheme extract

Question number	Answer	Mark
8(a)	**One** mark for accurate understanding of Peterson and Peterson (1959). **One** mark for exemplification of how the study can be used to explain the scenario. For example: • Peterson and Peterson (1959) found that vocal repetition led to greater recall of trigrams than silent repetition (1) and Chelsea performed vocal rehearsal on Sunday but silent rehearsal on Saturday so this accounts for her improved memory on Sunday (1). Accept any other appropriate response.	(2)

Type MS · Peterson and Peterson (1959): how long STM lasts

Answer 1 of 7 · Question 8 part a · 2 marks

2020 NOV · Paper 01 · extract 2 of 3 · find part a in this mark scheme extract

Question number	Answer	Mark
8(b)	**One** mark for identification of each weakness (maximum **two** marks). **One** mark for justification, which must be linked to each weakness identified (maximum **two** marks). For example: Weakness one • Peterson and Peterson (1959) used trigrams which are not an everyday stimulus for learning so lack validity (1) whereas Chelsea was learning a list of items to buy at the shop which are an everyday stimulus for learning so perhaps the study cannot fully explain Chelsea's memory of the items (1). Weakness two • Peterson and Peterson (1959) used controlled repeated intervals for rehearsal, which enabled them to compare accurately between conditions (1) whereas Chelsea may have not repeated the items for the shop or had controlled intervals so the study may not be able to account for Chelsea's memory of the items (1). Accept any other appropriate response.	**(4)**

Psychological problems – How would psychological problems affect you?

Type MS · Peterson and Peterson (1959): how long STM lasts

Answer 2 of 7 · Question 5 part a · 1 mark

2019 JUN · Paper 01 · find part a in this mark scheme extract

Question number	Answer	Mark
5(a)	**One** mark for correctly stating a finding. For example: • Participants could recall less than 10% of the trigrams after a 15 second interval (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
5(b)	**B** Trigrams **The only correct answer is** B **A** is not correct because they did not use word lists **C** is not correct because they did not use numbers **D** is not correct because they did not use lights	(1)

Type MS · Peterson and Peterson (1959): how long STM lasts

Answer 3 of 7 · Question 5 part b · 1 mark

2019 JUN · Paper 01 · find part b in this mark scheme extract

Question number	Answer	Mark
6(b)	**C** – 3's or 4's The only correct answer is C. A is incorrect because it was not 1's or 2's B is incorrect because it was not 2's or 3's D is incorrect because it was not 4's or 5's	(1)

Type MS · Peterson and Peterson (1959): how long STM lasts

Answer 7 of 7 · Question 6 part whole · 2 marks

2025 JUN · Paper 01 · extract 1 of 2 · find part whole in this mark scheme extract

Question number	Answer	Mark
6	**One** mark for statement of each part of the procedure. For example: • The participant had to count backwards in 3's or 4's to prevent rehearsal (in experiment part 1) (1). • Once the red light came on, the participant had to immediately recall the trigram (in experiment part 1) (1). • Each participant was tested eight times at each of six recall intervals: 3, 6, 9, 12, 15 and 18 seconds (in experiment part 1) (1). Accept any other appropriate response.	**(2)**
