Type MS · Calculating ratios

Answer 1 of 7 · Question 1 part d · 2 marks

2025 JUN · Paper 02 · extract 1 of 2 · find part d in this mark scheme extract

Question Number	Answer	Mark
1(a)	**The only correct answer is C -** *The number of participants who obeyed the man `s instruction to remain silent.* A is incorrect as this is the independent variable. B is incorrect as this is a control measure. D is incorrect as this is not the dependent variable.	**(1)**

Question Number	Answer	Mark
1(b)	**One** mark for understanding of a participant variable. **One** mark for application to the scenario. For example: • A participant variable is any characteristic of a person that could affect the study's results, other than the independent variable (1) for example, Thomas may have considered the gender of his sample as one gender/age may naturally be more obedient than the other (1). Accept any other appropriate response.	**(2)**

Question Number	Answer	Mark
1(c)	**One** mark for calculation of total number of participants. **One** mark for calculation of percentage. 22+11+8+19 = 60 (33/60)*100 = 55% Accept any other appropriate response.	**(2)**

Question Number	Answer	Mark
1(d)	**One** mark for calculation of total number of participants who disobeyed. **One** mark for correct answer. Calculation: • 8 + 19 = 27 Calculation: 27:60 simplified using a common factor • 9:20 Accept any other appropriate response.	**(2)**

Type MS · Calculating ratios

Answer 1 of 7 · Question 1 part d · 2 marks

2025 JUN · Paper 02 · extract 2 of 2 · find part d in this mark scheme extract

Question Number	Answer	Mark
1(e)	**One** mark for giving one way the findings support the conclusion. For example: • More than twice as many participants disobeyed the instruction to be silent when the man was wearing a jeans and t shirt than when the man was wearing a uniform. Accept any other appropriate answer.	**(1)**

Type MS · Calculating ratios

Answer 2 of 7 · Question 3 part b · 1 mark

2019 JUN · Paper 02 · extract 1 of 2 · find part b in this mark scheme extract

Question number	Answer	Mark
3(a)	**One** mark for correct calculation. • 9-5 = 4 Reject all other answers.	(1)

Question number	Answer	Mark
3(b)	**One** mark for correct answer. Calculation: 12:18 simplified using a common factor • 12/6:18/6 = 2:3 Accept any other appropriate response.	(1)

Type MS · Calculating ratios

Answer 2 of 7 · Question 3 part b · 1 mark

2019 JUN · Paper 02 · extract 2 of 2 · find part b in this mark scheme extract

Question number	Answer	Mark
3(c)	**One** mark for identification of a relevant improvement **One** mark for justification, which must be linked to the improvement identified For example: • Vanessa could observe driving behaviour on a number of different roads in different towns (1). This would improve the representativeness of the findings about driving speed of young and mature drivers in general (1). Accept any other appropriate response.	**(2)**

Type MS · Calculating ratios

Answer 3 of 7 · Question 3 part d · 1 mark

2020 NOV · Paper 02 · extract 1 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
3(a)	**One** mark for correct knowledge of a feature of a laboratory experiment For example: • A laboratory experiment takes place in an artificial environment for the participants (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(b)	**One** mark for knowledge of sampling method **One** mark for application to the scenario For example: • A volunteer sample is where people offer to take part in a piece of research (1), so Becca could advertise her experiment and ask for males and females to sign up to take part (1). Accept any other appropriate response	(2)

Type MS · Calculating ratios

Answer 3 of 7 · Question 3 part d · 1 mark

2020 NOV · Paper 02 · extract 2 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
3(c)	**One** mark for knowledge of single-blind technique. **One** mark for application to the scenario. • A single-blind technique hides the true aim of the study from the participants taking part (1) so that the males do not change their behaviour and try harder on the coordination task (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
3(d)	**One** mark for correct answer. Calculation: 30:25 simplified using common factor 30/5:25/5 • 6:5 Reject all other answers.	(1)

Question number	Answer	Mark
3(e)	**One** mark for calculating the difference. **One** mark for answer to two significant figures. • 63.51-57.24=6.27 (1) • 6.3 (1) Accept any other appropriate response.	(2)

Question number	Answer	Mark
3(f)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. • Females are better at word-meaning tasks than males (1) as the female participants were 12.15 seconds quicker than the male participants at this task (1). Accept any other appropriate response.	(2)

Type MS · Calculating ratios

Type MS · Calculating ratios

Answer 4 of 7 · Question 2 part c.i · 2 marks

2021 NOV · Paper 02 · extract 1 of 3 · find part c.i in this mark scheme extract

Question number	Answer	Mark
2(a)	**One** mark for correct knowledge of an observation For example: • An observation is where the researcher records behaviours they see displayed by their sample group (1). Accept any other appropriate response	(1)

Type MS · Calculating ratios

Answer 4 of 7 · Question 2 part c.i · 2 marks

2021 NOV · Paper 02 · extract 2 of 3 · find part c.i in this mark scheme extract

Question number	Answer	Mark
2(b)	**One** mark for understanding of sampling method **One** mark for application to the scenario For example: • An opportunity sample is of those who are available at the time (1), so Yolanda may record the activities of any children who happen to be playing during her time in the setting (1). Accept any other appropriate response	(2)

Question number	Answer	Mark
2(c)(i)	**One** mark for correct calculation of children who played with arts and crafts toys. **One** mark for correct answer. Calculation: 74-23-11-29= • 11 Calculation: 11:11 simplified using a common factor • 1:1 Accept any other appropriate response.	(2)

Question number	Answer	Mark
2(c)(ii)	**One** mark for calculation of percentage of children who played with role play toys. **One** mark for answer to two decimal places. • (29/74)*100 = 39.189189% • 39.19% (2d.p) Accept any other appropriate response.	(2)

Question number	Answer	Mark
2(d)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. • Boys prefer to play with stereotypically male toys (1) as there were 13 more boys observed playing with vehicles than girls (1). Accept any other appropriate response.	(2)

Type MS · Calculating ratios

Answer 4 of 7 · Question 2 part c.i · 2 marks

2021 NOV · Paper 02 · extract 3 of 3 · find part c.i in this mark scheme extract

Type MS · Calculating ratios

Answer 5 of 7 · Question 1 part c · 2 marks

2022 JUN · Paper 02 · extract 1 of 2 · find part c in this mark scheme extract

Question number	Answer	Mark
1(a)	C – Quantitative data **The only correct answer is C** A is incorrect as the data is numerical B is incorrect as the data is objective D is incorrect as the data is primary	(1)

Question number	Answer	Mark
1(b)	**One** mark for each appropriate way to standardise the procedure (maximum **two** marks). For example: • Andrew could use the same trigrams for each participant (1) • Andrew could show the trigrams to participants for the same amount of time (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(c)	**One** mark for correct calculation of male participants. **One** mark for correct answer. Calculation: 20/4= • 5 males Calculation: 5:15 simplified using a common factor • 1:3 Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(d)	**One** mark for calculation of total number of participants. **One** mark for calculation of percentage. • 3+8 = 11 • (11/20)*100 = 55% Accept any other appropriate response	(2)
Question number	**Answer**	**Mark**

Type MS · Calculating ratios

Answer 5 of 7 · Question 1 part c · 2 marks

2022 JUN · Paper 02 · extract 2 of 2 · find part c in this mark scheme extract

1(e)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. • The capacity of short-term memory is between 5 and 12 items (1) as 90% of participants correctly recalled between 5 and 12 of the trigrams they were shown (1). Accept any other appropriate response.	**(2)**

Type MS · Calculating ratios

Answer 6 of 7 · Question 1 part e · 2 marks

2023 JUN · Paper 02 · extract 1 of 3 · find part e in this mark scheme extract

Question number	Answer	Mark
1(a)	B – gender **The only correct answer is B** A is incorrect as this is not the independent variable. C is incorrect as this is not the independent variable. D is incorrect as this is not the independent variable.	(1)

Question number	Answer	Mark
1(b)	**One** mark for each correct ethical issue given (maximum **two** marks) For example: • Informed consent can be gained by explaining the study to parents when asking if the children can take part (1). • Gary could use pseudonyms for the children to make sure none of them could be identified from his research (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(c)	**One** mark for calculation of total number of participants. **One** mark for calculation of percentage. • 50+50 = 100 • (25/100)*100 = 25% Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(d)	**One** mark for correct calculation. Calculation: 32-24 • 8 Accept any other appropriate response.	(1)

Type MS · Calculating ratios

Answer 6 of 7 · Question 1 part e · 2 marks

2023 JUN · Paper 02 · extract 2 of 3 · find part e in this mark scheme extract

Question number	Answer	Mark
1(e)	**One** mark for correct calculation of number of children.	(2)
	One mark for correct answer. Calculation: • 32+24= 56 Calculation: 56:100 simplified using a common factor • 14:25 Accept any other appropriate response.	

Question number	Answer	Mark
1(f)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. • At six years old, girls can conserve number more accurately than boys (1) as more than twice as many girls than boys identified that the rows contained the same number of buttons (1). Accept any other appropriate response.	(2)

Answer 6 of 7 · Question 1 part e · 2 marks

2023 JUN · Paper 02 · extract 3 of 3 · find part e in this mark scheme extract

Type MS · Calculating ratios

Answer 7 of 7 · Question 3 part b · 2 marks

2024 JUN · Paper 02 · extract 1 of 2 · find part b in this mark scheme extract

Question number	Answer	Mark
3(a)	**One** mark for correct calculation. Calculation: 65 - 18 • 47 Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(b)	**One** mark for correct calculation of remaining participants. **One** mark for correct answer. Calculation: (180/3)*2= • 120 participants Calculation: 60:120 simplified using a common factor • 1:2 Accept any other appropriate response.	(2)

Question number	Answer	Mark
3(c)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. • The more hours of music a person listens to then the more likely they are to feel happy (1) as there is a positive correlation between hours listening to music and self-rated happiness scores out of 10 (1). Accept any other appropriate response.	(2)

Type MS · Calculating ratios
