Question number	Answer	Mark
11	**One** mark for identification of strength/weakness (maximum **two** marks).	**(4)**
	One mark for justification, which must be linked to the strength/weakness identified (maximum **two** marks). For example: Strength • Calvin will be prevented from driving dangerously during his six months in prison as he is physically removed from society and has no access to cars to drive (1) which is a strong punishment that may result in Calvin understanding the severity of his behaviour to prevent him repeating his actions once he is released from his custodial sentence (1). Weakness • A six-month custodial sentence for Calvin's driving offences is only a retributive punishment that may not deal with why Calvin was driving under the influence of alcohol (1). This means Calvin could reoffend when he is released from prison as the triggers or issues underlying his behaviour may not have been resolved through imprisonment (1). Accept any other appropriate response.

Question number	Indicative content	Mark
12	AO1 = 3 marks; AO2 = 3 marks; AO3 = 3 marks Markers must apply the descriptors in line with the general marking guidance (on pages 2–3). Due to the intrinsic links between the skills, if a response evidences performance against only one trait/skill it will be for demonstrating knowledge and understanding. An answer displaying qualities of AO1 only, cannot be awarded more than the top of Level 1, no matter how strong the performance is in AO1. AO1 • Prison is a custodial sentence when a person's freedom in society is taken away as punishment for a criminal offence. • Prison is a form of retributive justice where how long someone spends in prison should reflect the seriousness of the crime. • A person will be under supervision by prison staff and they have limited access to their family or friends. AO2 • Jeff will no longer have any freedom, so prison prevents him committing more crime and keeps society safe. • The robbery of a petrol station is a serious offence and the prison sentence of four years punishes Jeff for the crime. • Jeff may be able to work with prison staff to improve his life chances after prison when he returns to his family. AO3 • Reoffending may only be reduced while in prison so it may not work long term to help Jeff stop offending in the future when he leaves prison. • HM Chief Inspector of Prisons (2015) found that most prisons were overcrowded which may reduce the effectiveness of any prison staff working with Jeff to understand the seriousness of his crime. • Brunton-Smith and Hopkins (2014) found that vocational training in prison resulted in an increased likelihood of employment after release, so Jeff may gain skills to get a job after he has completed his punishment for the crime.	**(9)**
