23 Jimmy was shown a painting of people wearing formal clothes, walking along a street with square stones. The painting is shown in **Figure 2**.

(Source: © Paris Street in Rainy Weather (Rue de Paris, temps de pluie) by Gustave Caillebotte – CBW / Alamy Stock Photo)

Figure 2

A building can be seen in the painting, but it looks blurred and the path around it looks smooth. Jimmy knows that the people in the painting are closer than the building.

Explain, using texture gradient, why Jimmy knows that the people in the painting are closer than the building.

2022 JUN · Paper 02

Further practice · Attempt part whole only.

***26** Steven and Thomas were shown images of 10 ambiguous figures during a laboratory experiment. At each presentation of the image, a word for the image was read out. Steven and Thomas were read a different word for each image.

An example of an ambiguous figure and the words that were read to Steven and Thomas is shown in **Figure 2**.

Word read to Steven: Ruler

Word read to Thomas: Comb

Figure 2

When they were asked to draw the images, some of the pictures that Steven and Thomas drew looked different to the original images they had been shown.

Assess how well Carmichael, Hogan and Walter (1932) can explain why Steven and Thomas produced drawings that were different to the ambiguous figures.

26 Helga and Lena were asked by their manager to draw a map of the nature reserve where they worked. As Helga was drawing her map, the nature reserve warden commented that she should make sure the river showed some canoes that could be hired.

Helga and Lena finished drawing their maps. The manager commented that the boats on the lake on Helga's map looked like canoes on a river, but on Lena's map they looked just like the boats on the lake at the nature reserve.

Explain **two** ways the findings from Carmichael, Hogan, and Walter (1932) could account for Helga's and Lena's drawings.
