# Type MS · Operant conditioning: rewards and punishments that shape crime

## Answer 1 of 12 · Question 9 part whole · 2 marks

2025 JUN · Paper 02 · find part whole in this mark scheme extract

| Question Number | Answer | Mark |
|---|---|---|
| 9 | **One** mark for accurate understanding of negative punishment. **One** mark for exemplification of how negative punishment can be used to explain the scenario.<br><br>For example:<br><br>• Negative punishment is where a desired outcome, such as being able to drive, is removed (1), so Tamara could lose her driving license for a period of time which means she will not be able to drive faster than the speed limit (1).<br>• Negative punishment is where a desired outcome, such as being able to drive, is removed (1), so Tamara could be banned from driving her car for a set period to ensure that she will not drive dangerously and nearly cause accidents (1).<br><br>Accept any other appropriate response | **(2)** |

## Type MS · Operant conditioning: rewards and punishments that shape crime

Answer 2 of 12 · Question 8 part whole · 1 mark

2019 JUN · Paper 02 · find part whole in this mark scheme extract

| Question number | Answer | Mark |
|---|---|---|
| 8 | C - secondary reinforcer<br>**The only correct answer is C**<br>A is incorrect as a token does not directly meet basic needs<br>B is incorrect as this is not a type of reinforcer<br>D is incorrect as this is not a type of reinforcer | **(1)** |

# Type MS · Operant conditioning: rewards and punishments that shape crime

## Answer 3 of 12 · Question 14 part whole · 9 marks

2019 JUN · Paper 02 · extract 1 of 3 · find part whole in this mark scheme extract

| Question number | Indicative content | Mark |
|---|---|---|
| **14** | AO1 = 3 marks; AO2 = 3 marks; AO3 = 3 marks<br><br>Markers must apply the descriptors in line with the general marking guidance (on pages 2–3).<br><br>Due to the intrinsic links between the skills, if a response evidences performance against only one trait/skill it will be for demonstrating knowledge and understanding. An answer displaying qualities of AO1 only, cannot be awarded more than the top of Level 1, no matter how strong the performance is in AO1.<br><br>AO1<br>• Positive reinforcement is when a desired consequence is received following a particular behaviour, so behaviour continues.<br>• Positive punishment is receiving an undesired consequence that is supposed to stop a behaviour.<br>• Negative reinforcement is the removal of an undesired consequence because of a behaviour, which encourages behaviour to continue.<br><br>AO2<br>• Maurice desires the things he steals and they make him feel good, so his stealing behaviour is reinforced and continues.<br>• The consequence of a community sentence may not have been considered sufficiently undesirable, so would not have stopped Maurice stealing.<br>• Being able to feel better about providing for his family removes Maurice's sense of worthlessness and he gains pleasure from stealing.<br><br>AO3<br>• Skinner (1938) found that rats continued a behaviour for a food pellet so there is evidence that positive reinforcement can lead to the continuation of behaviour like Maurice's stealing.<br>• Positive punishment such as a prison sentence may be a more undesirable consequence than community sentencing, so could stop Maurice from stealing more effectively.<br>• Maurice may be predisposed to criminal behaviour as a result of his inherent personality, therefore the consequences of his behaviour would have no effect on his stealing. | **(9)** |

# Type MS · Operant conditioning: rewards and punishments that shape crime

## Answer 3 of 12 · Question 14 part whole · 9 marks

2019 JUN · Paper 02 · extract 2 of 3 · find part whole in this mark scheme extract

| Level | Mark | Descriptor |
|---|---|---|
| | 0 | No rewardable material. |
| Level 1 | 1–3 | • Demonstrates isolated elements of knowledge and understanding of a limited range of psychological ideas (AO1).<br>• Provides little or no reference to relevant psychological ideas related to the context (AO2).<br>• Limited attempt to deconstruct relevant psychological ideas. Limited consideration of supporting/refuting evidence, leading to generic judgements (AO3). |
| Level 2 | 4–6 | • Demonstrates mostly accurate understanding of some relevant psychological ideas (AO1).<br>• Provides some reference to relevant psychological ideas related to the context but this may be limited or lack relevance at times (AO2).<br>• Deconstructs relevant psychological ideas using mostly logical chains of reasoning. Some consideration of supporting/refuting evidence, leading to a judgement (AO3). |
| Level 3 | 7–9 | • Demonstrates accurate and thorough knowledge and understanding of relevant psychological ideas (AO1).<br>• Provides sustained reference to relevant psychological ideas related to the context (AO2).<br>• Deconstructs relevant psychological ideas using logical chains of reasoning. Sustained consideration of supporting/refuting evidence, showing an awareness of competing arguments, leading to a judgement (AO3). |

Answer 4 of 12 · Question 9 part whole · 2 marks

2020 NOV · Paper 02 · find part whole in this mark scheme extract

| Question number | Answer | Mark |
|---|---|---|
| 9 | **One** mark for identification of weakness.<br>**One** mark for justification, which must be linked to the weakness identified.<br><br>For example:<br><br>• Melanie may not think a verbal warning for exceeding the speed limit is a severe punishment (1) therefore it is not enough of an undesired consequence to stop her driving in excess of the speed limit again (1).<br><br>Accept any other appropriate response. | **(2)** |

## Type MS · Operant conditioning: rewards and punishments that shape crime

Answer 5 of 12 · Question 12 part whole · 2 marks

2021 NOV · Paper 02 · find part whole in this mark scheme extract

| Question number | Answer | Mark |
|---|---|---|
| 12 | **One** mark for identification of a way.<br>**One** mark for reasoning/justification of the way through theory.<br><br>For example:<br><br>• Niall would not like his games console being removed as it is something he enjoys using and would desire to play with (1) therefore using negative punishment of removing something desired stops Niall's unwanted anti-social behaviour (1).<br><br>Accept any other appropriate response. | **(2)** |

## Type MS · Operant conditioning: rewards and punishments that shape crime

Answer 6 of 12 · Question 7 part whole · 1 mark

2022 JUN · Paper 02 · find part whole in this mark scheme extract

| Question number | Answer | Mark |
|---|---|---|
| 7 | **One** mark for knowledge of a secondary reinforcer.<br><br>• A secondary reinforcer is a token or reward that has a value of exchange to meet a primary need (1).<br><br>Accept any other appropriate response. | **(1)** |

## Type MS · Operant conditioning: rewards and punishments that shape crime

### Answer 7 of 12 · Question 11 part whole · 4 marks

2022 JUN · Paper 02 · extract 1 of 2 · find part whole in this mark scheme extract

| Question number | Answer | Mark |
|---|---|---|
| **11** | **One** mark for identification of strength/weakness (maximum **two** marks).<br>**One** mark for justification, which must be linked to the strength/weakness identified (maximum **two** marks).<br><br>For example:<br>Strength<br>• When he plays his music inappropriately loud Edward could immediately receive an undesired consequence of something he does not like which is directly associated with Edwards behaviour (1) which is likely to make Edward stop the anti-social behaviour as he will not want to receive the consequences that result from his actions (1).<br><br>Weakness<br>• Using only positive punishment for anti-social acts like swearing means Edward would not receive any positive reinforcement for when he is behaving well in society (1). This means Edward may not repeat or continue the desired appropriate behaviour of not swearing and his behaviour is unlikely to improve (1).<br><br>Accept any other appropriate response. | **(4)** |
