Answer 1 of 7 · Question 5 part whole · 12 marks

2025 JUN · Paper 02 · extract 1 of 4 · find part whole in this mark scheme extract

Question number	Indicative content	Mark
5	AO1 = 4 marks; AO2 = 4 marks; AO3 = 4 marks Markers must apply the descriptors in line with the general marking guidance (on pages 2–3). Due to the intrinsic links between the skills, if a response evidences performance against only one trait/skill it will be for demonstrating knowledge and understanding. An answer displaying qualities of AO1 only, cannot be awarded more than the top of Level 1, no matter how strong the performance is in AO1. **AO1** • Unstructured interviews are an informal self-report technique where researchers ask questions about specific topic areas, but these questions are not pre planned. • Unstructured interviews more commonly use open-ended questions which produce in-depth qualitative data. • An unstructured format allows an interview to flow like a conversation with questions often constructed after a participant's previous response. • Unstructured interviews are often used when topic areas may be more sensitive or complex. **AO2** • Schaffer and Emerson (1964) conducted unstructured interviews over 12 months in the mother's own home focusing on several contact behaviours shown by infants towards their mothers. • Schaffer and Emerson's (1964) study used open-ended questioning with mothers, giving full descriptions of their children's behaviours meaning in-depth qualitative data was gathered. • Many mothers gave spontaneous demonstrations of their infant's behaviour, which gave further detail about the previous responses that they had given. • Schaffer and Emerson's (1964) study looked at reactions to avoidance of physical contact which may be classed as a sensitive topic area for parents. **AO3** • Unstructured interviews are very flexible which allows the researcher to establish a rapport with the mothers, meaning they	(12)

	were more likely to give truthful responses, increasing the validity of the findings. • Qualitative data is more susceptible to researcher bias with the information given by the mothers such as 'restless until put back in cot' having to be interpretated by the researchers. • Unstructured interviews allow researchers to check they have understood the meaning of a response through further questioning, lowering misunderstandings and increasing the credibility of the findings. • The use of face-to-face interviews rather than questionnaires for sensitive topic areas may lead to responses which show social desirability bias leading to inaccurate conclusions.

Answer 1 of 7 · Question 5 part whole · 12 marks

2025 JUN · Paper 02 · extract 3 of 4 · find part whole in this mark scheme extract

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	• Demonstrates limited knowledge and understanding of psychological processes and procedures, may not always be relevant (AO1). • Little or no application of psychological processes and procedures to the context (AO2). • Limited attempt to evaluate psychological processes and procedures. Little or no connections between the elements in the question, with unsupported, generic judgements. Limited conclusion that is not fully justified (AO3).
Level 2	4–6	• Demonstrates mostly accurate knowledge and understanding of relevant psychological processes and procedures (AO1). • Some application of psychological processes and procedures to the context but may be limited or lack relevance (AO2). • Some attempt to evaluate psychological processes and procedures but may draw on limited evidence. Mostly logical chains of reasoning, leading to judgements. Basic conclusion reached but may be superficial (AO3).
Level 3	7–9	• Demonstrates accurate and thorough knowledge and understanding of relevant psychological processes and procedures (AO1). • Relevant and accurate application of psychological processes and procedures to the context (AO2). • Sustained and accurate evaluation of psychological processes and procedures, supported with accurate evidence. Sustained and logical chains of reasoning, leading to relevant judgements with justified conclusion (AO3).
Level 4	10–12	• Demonstrates comprehensive and accurate knowledge and understanding of relevant psychological processes and procedures throughout (AO1). • Sustained relevant and accurate application of psychological processes and procedures to the context (AO2). • Comprehensive evaluation of psychological processes and procedures supported with accurate and thorough use of evidence. Sustained and logical chains of reasoning, leading to fully supported judgements with well-justified conclusion (AO3).

Criminal psychology – Why do people become criminals?

Type MS · Questionnaires and interviews

Answer 2 of 7 · Question 1 part a · 1 mark

2019 JUN · Paper 02 · extract 1 of 3 · find part a in this mark scheme extract

Question number	Answer	Mark
1(a)	A - structured interview **The only correct answer is A** B is incorrect as this uses open questions C is incorrect as this uses mixed question types D is incorrect as this is not an interview method	(1)

Question number	Answer	Mark
1(b)	**One** mark for correct knowledge of right to withdraw. • A right to withdraw is when a participant can stop taking part in a research investigation (1). Accept any other appropriate response.	(1)

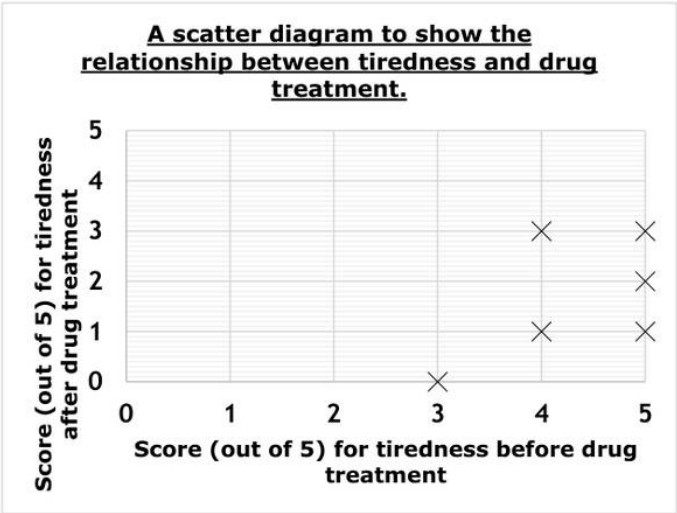

Question number	Answer	Mark
1(c)	**One** mark for each way to ensure confidentiality (maximum of **two** marks). For example: • Real names of the patients with depression interviewed would not be included in the research (1). • The location of the mental health service provider could be kept out of the public domain (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(d)(i)	**One** mark for calculation of decrease in score. **One** mark for calculation of percentage decrease. • 4-1 = 3 • (3/4)*100 = 75% Reject all other answers.	(2)

Answer 4 of 7 · Question 7 part whole · 12 marks

2021 NOV · Paper 02 · extract 1 of 3 · find part whole in this mark scheme extract

Question number	Indicative content	Mark
7	AO1 = 4 marks; AO2 = 4 marks; AO3 = 4 marks Markers must apply the descriptors in line with the general marking guidance (on pages 2–3). Due to the intrinsic links between the skills, if a response evidences performance against only one trait/skill it will be for demonstrating knowledge and understanding. An answer displaying qualities of AO1 only, cannot be awarded more than the top of Level 1, no matter how strong the performance is in AO1. **AO1** • Questionnaires can contain closed-ended and open-ended questions to gather quantitative and qualitative data. • A questionnaire can be retested to check for consistency and reliability of the items included in it. • The items in a questionnaire may reflect the ideas of the researcher and could contain bias or leading questions. • Questionnaires can be easy to distribute to a large sample of the population in comparison to other methods. **AO2** • The BPAQ gathers quantitative data through scaled questions that are then scored to give levels of aggression in the predetermined categories. • Since 1992 the BPAQ has been reused many times so can be considered a reliable test of levels of aggression in adults. • Being 'open with friends' may be considered a trait of honesty by some people, but researchers may score this as verbal aggression. • Using the internet enables the researcher to quickly distribute large numbers of the BPAQ questionnaire to adults to study levels of aggression. **AO3** • Respondents using the BPAQ are unable to explain the reasons for their choice in answer so the use of the questionnaire lacks depth and context. • Replication of the questionnaire means the data can be compared to previous research to identify trends in aggressive behaviour. • The subjectivity of how statements in the BPAQ are interpreted by the respondent reduces the validity of the questionnaire as a measure of aggression. • Large scale samples can reduce the effect of anomalies on the data, such as one or two extremely high or low aggression scores, so findings are more accurate.	**(12)**

Criminal psychology – Why do people become criminals?

Type MS · Questionnaires and interviews

Answer 5 of 7 · Question 3 part a · 1 mark

2022 JUN · Paper 02 · extract 1 of 3 · find part a in this mark scheme extract

Question number	Answer	Mark
3(a)	**One** mark for correct knowledge of a structured interview. • A structured interview is when a researcher has predetermined questions that they ask interviewees (1). Accept any other appropriate response.	(1)

Type MS · Questionnaires and interviews

Answer 5 of 7 · Question 3 part a · 1 mark

2022 JUN · Paper 02 · extract 2 of 3 · find part a in this mark scheme extract

Question number	Answer	Mark
3(b)	**One** mark for understanding of sampling method. **One** mark for application to the scenario. For example: • A random sample is when the participants in a target group all have an equal chance of selection (1), so Juliet could put the names of the available 17-year-old students into a hat and pick out her participant sample (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
3(c)	**One** mark for accurate identification of the type of data. For example: • Juliet gathered primary data directly from the 17-year old students (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(d)	**One** mark for correct calculation of the mode for body image scores. • 7 (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(e)	**One** mark for giving one way the findings support the conclusion. For example: • As the number of hours spent on social media increased the scores for body image decreased (1). Accept any other appropriate response.	(1)

2022 JUN · Paper 02 · extract 1 of 2 · find part a in this mark scheme extract

Question number	Answer	Mark
4(a)	**One** mark for understanding of open-ended questions. **One** mark for application to the scenario. • An open-ended question allows respondents to answer freely using their own words and thoughts (1) so Jamie could gather detailed information about why the participants felt they did or did not obey authority figures (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
4(b)	**One** mark for stating one ethical issue that should be considered in the investigation. • All participants should have the right to withdraw from an investigation (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
4(c)	**One** mark for correct rank ordering. **One** mark for correct answer. • Rank ordering: 13 14 14 15 16 18 18 19 • (15+16)/2 = 15.5 Accept any other appropriate response.	(2)

Question number	Answer	Mark
4(d)	**One** mark for correct calculation. Calculation: 19 - 13 • 6 Accept any other appropriate response.	(1)

Type MS · Questionnaires and interviews

Answer 6 of 7 · Question 4 part a · 2 marks

2022 JUN · Paper 02 · extract 2 of 2 · find part a in this mark scheme extract

Type MS · Questionnaires and interviews

Answer 7 of 7 · Question 2 part a · 2 marks

2024 JUN · Paper 02 · extract 1 of 2 · find part a in this mark scheme extract

Question number	Answer	Mark
2(a)	**One** mark for each appropriate question (maximum **two** marks) For example: Open-ended question • Why do you use social media sites? (1) Closed-ended question • How many hours do you spend on social media each day? 0-3 hrs; 4-7 hrs; 8-10 hrs; more than 10 hrs (1). Accept any other appropriate response	**(2)**

Question number	Answer	Mark
2(b)	**One** mark for understanding of sampling method. **One** mark for application to the scenario. For example: • A stratified sample is when the population is divided into categories and a representative number of people is calculated for the sample (1), so Jason could divide his target population of social media users into different age groups to get a proportionate sample of each age group (1). Accept any other appropriate response.	**(2)**

Type MS · Questionnaires and interviews

Answer 7 of 7 · Question 2 part a · 2 marks

2024 JUN · Paper 02 · extract 2 of 2 · find part a in this mark scheme extract

Question number	Answer	Mark
2(c)	**One** mark for correct knowledge of qualitative data. • Qualitative data is data that is gathered in the form of words, descriptions or images (1). Accept any other appropriate response.	(1)
