Type MS · Types of data

Answer 1 of 7 · Question 4 part c · 2 marks

2025 JUN · Paper 02 · extract 1 of 2 · find part c in this mark scheme extract

Question Number	Answer	Mark
4(a)	**One** mark for correct calculation of the mode before the ban. • 7 Reject all other answers.	**(1)**

Question Number	Answer	Mark
4(b)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. For example: • Putting in place an unhealthy food ban leads to a more negative attitude towards eating unhealthy food (1), as ratings are at least two points lower for all participants after the ban (1). Accept any other appropriate response.	**(2)**

Question Number	Answer	Mark
4(c)	**One** mark for accurate definition of qualitative data. **One** mark for suitable example of qualitative data. For example: • Qualitative data is non-numerical/descriptive data which allows researchers to explore a topic in more depth (1). For example, using open questions to gather opinions on a specific topic area (1). Accept any other appropriate response.	**(2)**

Answer 2 of 7 · Question 6 part d · 2 marks

2019 JUN · Paper 02 · extract 1 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
6(a)	**One** mark for a correct answer • 39,980,000 = 3.998 x 10^7 Reject all other answers.	(1)

Type MS · Types of data

Answer 2 of 7 · Question 6 part d · 2 marks

2019 JUN · Paper 02 · extract 2 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
6(b)	**One** mark for an appropriate estimation 40,000,000 – 10,000,000 • 30,000,000 Accept any other appropriate response.	(1)

Question number	Answer	Mark
6(c)	**One** mark for a correct answer Calculation: 63% = 0.63 0.63 x 39,980,000 = 25,187,400 • 25,187,400 Reject all other answers.	(1)

Question number	Answer	Mark
6(d)	**One** mark for correct identification of primary data example **One** mark for correct identification of secondary data example **Type of data** / **Example from Kayla's investigation** Primary data — **Online questionnaire** Secondary data — **Two newspaper articles** Accept any other appropriate response.	(2)

Answer 2 of 7 · Question 6 part d · 2 marks

2019 JUN · Paper 02 · extract 3 of 3 · find part d in this mark scheme extract

Type MS · Types of data

Answer 3 of 7 · Question 1 part b · 1 mark

2020 NOV · Paper 02 · find part b in this mark scheme extract

Question number	Answer	Mark
1(a)	C - closed–ended question **The only correct answer is C** A is incorrect as this is not a question type B is incorrect as this would not include limited answer options D is incorrect as this is not a question type	(1)

Question number	Answer	Mark
1(b)	**One** mark for correct knowledge of the type of data gathered. • Quantitative data (1). Accept any other appropriate response.	(1) EXP

Question number	Answer	Mark
1(c)	**One** mark for correct answer. • $\frac{9}{15}$ simplified 9/3 and 15/3 = $\frac{3}{5}$ (1) Reject all other answers.	(1)

Type MS · Types of data

Answer 4 of 7 · Question 1 part a · 1 mark

2022 JUN · Paper 02 · extract 1 of 2 · find part a in this mark scheme extract

Question number	Answer	Mark
1(a)	C – Quantitative data **The only correct answer is C** A is incorrect as the data is numerical B is incorrect as the data is objective D is incorrect as the data is primary	(1)

Question number	Answer	Mark
1(b)	**One** mark for each appropriate way to standardise the procedure (maximum **two** marks). For example: • Andrew could use the same trigrams for each participant (1) • Andrew could show the trigrams to participants for the same amount of time (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(c)	**One** mark for correct calculation of male participants. **One** mark for correct answer. Calculation: 20/4= • 5 males Calculation: 5:15 simplified using a common factor • 1:3 Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(d)	**One** mark for calculation of total number of participants. **One** mark for calculation of percentage. • 3+8 = 11 • (11/20)*100 = 55% Accept any other appropriate response	(2)
Question number	**Answer**	**Mark**

Type MS · Types of data

Answer 4 of 7 · Question 1 part a · 1 mark

2022 JUN · Paper 02 · extract 2 of 2 · find part a in this mark scheme extract

1(e)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. • The capacity of short-term memory is between 5 and 12 items (1) as 90% of participants correctly recalled between 5 and 12 of the trigrams they were shown (1). Accept any other appropriate response.	**(2)**

Answer 5 of 7 · Question 3 part c · 1 mark

2022 JUN · Paper 02 · extract 1 of 3 · find part c in this mark scheme extract

Question number	Answer	Mark
3(a)	**One** mark for correct knowledge of a structured interview. • A structured interview is when a researcher has predetermined questions that they ask interviewees (1). Accept any other appropriate response.	(1)

Type MS · Types of data

Answer 5 of 7 · Question 3 part c · 1 mark

2022 JUN · Paper 02 · extract 2 of 3 · find part c in this mark scheme extract

Question number	Answer	Mark
3(b)	**One** mark for understanding of sampling method. **One** mark for application to the scenario. For example: • A random sample is when the participants in a target group all have an equal chance of selection (1), so Juliet could put the names of the available 17-year-old students into a hat and pick out her participant sample (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
3(c)	**One** mark for accurate identification of the type of data. For example: • Juliet gathered primary data directly from the 17-year old students (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(d)	**One** mark for correct calculation of the mode for body image scores. • 7 (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(e)	**One** mark for giving one way the findings support the conclusion. For example: • As the number of hours spent on social media increased the scores for body image decreased (1). Accept any other appropriate response.	(1)

2022 JUN · Paper 02 · extract 3 of 3 · find part c in this mark scheme extract

Type MS · Types of data

Answer 6 of 7 · Question 2 part c · 1 mark

2024 JUN · Paper 02 · extract 1 of 2 · find part c in this mark scheme extract

Question number	Answer	Mark
2(a)	**One** mark for each appropriate question (maximum **two** marks) For example: Open-ended question • Why do you use social media sites? (1) Closed-ended question • How many hours do you spend on social media each day? 0-3 hrs; 4-7 hrs; 8-10 hrs; more than 10 hrs (1). Accept any other appropriate response	**(2)**

Question number	Answer	Mark
2(b)	**One** mark for understanding of sampling method. **One** mark for application to the scenario. For example: • A stratified sample is when the population is divided into categories and a representative number of people is calculated for the sample (1), so Jason could divide his target population of social media users into different age groups to get a proportionate sample of each age group (1). Accept any other appropriate response.	**(2)**

Type MS · Types of data

Answer 6 of 7 · Question 2 part c · 1 mark

2024 JUN · Paper 02 · extract 2 of 2 · find part c in this mark scheme extract

Question number	Answer	Mark
2(c)	**One** mark for correct knowledge of qualitative data. • Qualitative data is data that is gathered in the form of words, descriptions or images (1). Accept any other appropriate response.	(1)

Type MS · Types of data

Answer 7 of 7 · Question 5 part b · 2 marks

2024 JUN · Paper 02 · extract 1 of 3 · find part b in this mark scheme extract

Question number	Answer	Mark
5(a)	**One** mark for correct knowledge of a case study. • A case study is in-depth research often undertaken with a single person that collects a range of data using different methods (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
5(b)	**One** mark for correct knowledge of quantitative data. **One** mark for an appropriate example from the scenario. • Quantitative data is data that can be counted or measured numerically (1), such as measuring the alcohol consumed by the patient each week in units (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
5(c)	**One** mark for an appropriate estimation. 300 - 60 • 240 Accept any other appropriate response.	(1)

Question number	Answer	Mark
5(d)	**One** mark for correct calculation of the mode for units of alcohol consumed. • 79 (1). Reject all other answers.	(1)

Type MS · Types of data

Answer 7 of 7 · Question 5 part b · 2 marks

2024 JUN · Paper 02 · extract 2 of 3 · find part b in this mark scheme extract

Question number	Answer	Mark
5(e)	**One** mark for correct rank ordering. **One** mark for correct answer. • Rank ordering: 34 45 63 70 72 77 79 79 • (70+72)/2 = 71 Accept any other appropriate response.	(2)

Question number	Answer	Mark
5(f)	**One** mark for accurately giving 12.81924 to two decimal places. For example; • 12.82 (1). Reject all other answers.	(1)
