Practice workbook · Van Houtte & Jarvis (1995): pets and children

Pet ownership and children's autonomy and self-esteem.

5 question parts: 1 worked-example retry and 4 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

1. Question 19 · part whole · 9 marks

2025 JUN · Paper 02

Worked-example retry · Attempt part whole only.

***19** Sammie is 10 years old and in the fifth grade at school. Her mother, Joanna, notices that she has few friends at school and always says that the girls in her class are more intelligent than her. Sammie does not like being away from her mother for long.

Joanna is worried because Sammie is starting a new school in September. She does not think Sammie will cope. Joanna reads an article about the benefits of owning a pet, so buys Sammie a rabbit.

After a few months looking after her rabbit, Sammie seems more self-confident. She recently went to play at a friend's house for the very first time.

Assess how well Van Houtte and Jarvis (1995) can explain Sammie's behaviour.

***21** A local school has started offering a special 'pets at school' service where people bring pets into school for the children to look after during the day. The children who are chosen to spend time with the pets have previously been identified as having low self-esteem and a negative self-concept.

After six weeks of using the 'pets at school' service, the children reported that they feel more confident in making decisions for themselves. The children also reported that they felt important and useful when looking after the pets.

Assess how well the findings from Van Houtte and Jarvis (1995) can explain the impact of the 'pets at school' service.

17 Jessica feels pressured and under stress with her job and family commitments, so she visits a counsellor for help.

Jessica tells the counsellor that she feels like she cannot cope and the only time she feels relaxed is when she walks her neighbour's dog once a month.

Explain **one** suggestion the counsellor could give Jessica to help her cope with her stress.

You should refer to a study in your answer.

19 Mable and Kelsey are 11 years old. Mable has a pet dog she likes to play with. She is responsible for feeding her dog. At school, Mable is confident and happy to work in groups and on her own.

Kelsey is less confident at school and worries about whether he is liked. He does not want to work alone as he prefers reassurance from working with other children. Kelsey would like a pet, but he is not allowed.

Explain **two** ways the findings from Van Houtte and Jarvis (1995) could account for Mable's and Kelsey's behaviour.
