Practice workbook · Piliavin et al. (1969): helping on the New York subway

The procedure, findings and conclusions of Piliavin et al. and their use in explaining helping scenarios.

7 question parts: 1 worked-example retry and 6 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

25 Justin is investigating how people respond in the presence of others in crowded situations. He recruits confederates to stand in a queue in a crowded shopping centre, with one real participant in the queue. One of the confederates steals the purse from another confederate's backpack, in full view of the real participant, and then walks off with the purse. The real participant can see that all of the confederates have seen what has happened.

Justin repeated the scenario with the real participant being male or female on many occasions during the course of a day.

Explain what Justin is likely to find regarding the real participant's reaction to the theft of the purse in the crowded shopping centre.

You should refer to Piliavin et al. (1969) in your answer.

2021 NOV · Paper 01

Further practice · Attempt part b only.

24 Kyle is waiting for an underground train. He is going to an important meeting.

He sees a drunk man trip and fall on the platform just as his train is about to leave. Kyle knows that if he stops to help, he will be late for his meeting.

Kyle stops to help the drunk man and misses his train.

(a) Explain why Kyle may have decided to help the drunk man.

You should refer to pro-social behaviour in your answer.

(2)

(b) Kyle's female colleague, Joanne, did not stop to help the drunk man with Kyle and boarded the train.

Explain why Joanne may have chosen not to help the drunk man and boarded the train.

You should refer to Piliavin et al. (1969) in your answer.

2021 NOV · Paper 01

Further practice · Attempt part b only.

Table 3 shows the people who decided to help or not to help the drunk man.

	Helped within 30 seconds	Helped within 60 seconds	Did not help
Male, same race as drunk man	2	0	1
Female, same race as drunk man	0	0	3
Male, different race as drunk man	2	0	1
Female, different race as drunk man	0	0	2

Table 3

(c) Explain **two** conclusions that could be made from the data in **Table 3**. **(4)**
