Type MS · Monocular depth cues: judging distance with one eye

Answer 1 of 11 · Question 23 part whole · 2 marks

2025 JUN · Paper 02 · extract 1 of 2 · find part whole in this mark scheme extract

Question Number	Answer	Mark
23	**One** mark for accurate understanding of texture gradient. **One** mark for exemplification of how texture gradient can be used to explain the scenario. For example: • Texture gradient is a monocular depth cue where an object is seen as further away if its surface appears less detailed and less clear (1). Jimmy knew that the people were closer than the building as the clothes on the people were clear and the shape of the stones visible, whereas the building was blurred and the path lacked detail (1). Accept any other appropriate response.	**(2)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 1 of 11 · Question 23 part whole · 2 marks

2025 JUN · Paper 02 · extract 2 of 2 · find part whole in this mark scheme extract

Type MS · Monocular depth cues: judging distance with one eye

Answer 2 of 11 · Question 22 part whole · 1 mark

2019 JUN · Paper 02 · find part whole in this mark scheme extract

Question number	Answer	Mark
22	D – linear perspective **The only correct answer is D** A is incorrect as this is not an ambiguous figure B is incorrect as this is not stereopsis C is incorrect as this is not superimposition	**(1)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 3 of 11 · Question 23 part whole · 1 mark

2019 JUN · Paper 02 · find part whole in this mark scheme extract

Question number	Answer	Mark
23	**One** mark for knowledge of relative size. • Relative size is when a smaller object is considered further away when perceived with a similar object that is bigger (1). Accept any other appropriate response.	**(1)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 4 of 11 · Question 22 part whole · 1 mark

2021 NOV · Paper 02 · find part whole in this mark scheme extract

Question number	Answer	Mark
22	A - superimposition **The only correct answer is A** B is incorrect as this is not the correct visual cue C is incorrect as this is not the correct visual cue D is incorrect as this is not the correct visual cue	**(1)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 5 of 11 · Question 23 part whole · 1 mark

2021 NOV · Paper 02 · find part whole in this mark scheme extract

Question number	Answer	Mark
23	**One** mark for knowledge of linear perspective. • When parallel lines appear to join together as they go into the distance to give perception of depth (1). Accept any other appropriate response.	**(1)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 6 of 11 · Question 25 part whole · 2 marks

2021 NOV · Paper 02 · extract 1 of 2 · find part whole in this mark scheme extract

Question number	Answer	Mark
25	**One** mark for accurate understanding of relative size. **One** mark for exemplification of how relative size can be used to explain the scenario. For example: • Relative size would be when a smaller object is perceived as being further away if it is viewed with a similar object that is bigger (1) so Sadira would consider the large giraffe to be closer than the small giraffe as they are both similar objects that vary in size, so indicating distance (1). Accept any other appropriate response.	**(2)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 6 of 11 · Question 25 part whole · 2 marks

2021 NOV · Paper 02 · extract 2 of 2 · find part whole in this mark scheme extract

Type MS · Monocular depth cues: judging distance with one eye

Answer 7 of 11 · Question 22 part whole · 2 marks

2022 JUN · Paper 02 · find part whole in this mark scheme extract

Question number	Answer	Mark
22	Up to **two** marks for understanding of texture gradient. For example: • Texture gradient is where different levels of detail can be seen in the texture of an object (1) so as the texture becomes smoother and finer it indicates a further distance and depth in monocular vision (1). Accept any other appropriate response.	**(2)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 8 of 11 · Question 22 part whole · 2 marks

2023 JUN · Paper 02 · extract 1 of 2 · find part whole in this mark scheme extract

Question number	Answer	Mark
22	Up to **two** marks for understanding of how superimposition creates depth perception. For example: • Superimposition is when the positioning of one object partially blocks the perception of another object making it appear to be at the front (1) which would give the perception of depth that the object blocked from view appears to be further behind the object that can be seen in full (1). Accept any other appropriate response.	**(2)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 8 of 11 · Question 22 part whole · 2 marks

2023 JUN · Paper 02 · extract 2 of 2 · find part whole in this mark scheme extract

Type MS · Monocular depth cues: judging distance with one eye

Answer 9 of 11 · Question 23 part whole · 2 marks

2023 JUN · Paper 02 · find part whole in this mark scheme extract

Question number	Answer	Mark
23	**One** mark for accurate understanding of height in the plane. **One** mark for exemplification of how height in the plane can be used to explain the scenario. For example: • Height in the plane is a depth cue where the perceived distance of an object from a horizon line gives the perception of depth (1) so Anaya is able to identify that the objects that are nearest to the horizon line, such as the house, would be considered as furthest from her viewing position (1). Accept any other appropriate response.	**(2)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 10 of 11 · Question 24 part whole · 2 marks

2024 JUN · Paper 02 · extract 1 of 2 · find part whole in this mark scheme extract

Question number	Answer	Mark
24	**One** mark for accurate understanding of linear perspective. **One** mark for exemplification of how linear perspective can be used to explain the scenario. For example: • Linear perspective is when parallel lines converge at a single point on a horizontal line to give the perception of depth (1). This will help Hakim draw his picture as buildings and roads in the drawing will narrow towards the horizon, so his drawing will appear to show objects near and far in the landscape (1). Accept any other appropriate response.	**(2)**

Type MS · Monocular depth cues: judging distance with one eye

Answer 10 of 11 · Question 24 part whole · 2 marks
