Type MS · Extraneous variables and how to control them

Answer 1 of 6 · Question 1 part b · 2 marks

2025 JUN · Paper 02 · extract 1 of 2 · find part b in this mark scheme extract

Question Number	Answer	Mark
1(a)	**The only correct answer is C -** *The number of participants who obeyed the man `s instruction to remain silent.* A is incorrect as this is the independent variable. B is incorrect as this is a control measure. D is incorrect as this is not the dependent variable.	**(1)**

Question Number	Answer	Mark
1(b)	**One** mark for understanding of a participant variable. **One** mark for application to the scenario. For example: • A participant variable is any characteristic of a person that could affect the study's results, other than the independent variable (1) for example, Thomas may have considered the gender of his sample as one gender/age may naturally be more obedient than the other (1). Accept any other appropriate response.	**(2)**

Question Number	Answer	Mark
1(c)	**One** mark for calculation of total number of participants. **One** mark for calculation of percentage. 22+11+8+19 = 60 (33/60)*100 = 55% Accept any other appropriate response.	**(2)**

Question Number	Answer	Mark
1(d)	**One** mark for calculation of total number of participants who disobeyed. **One** mark for correct answer. Calculation: • 8 + 19 = 27 Calculation: 27:60 simplified using a common factor • 9:20 Accept any other appropriate response.	**(2)**

Type MS · Extraneous variables and how to control them

Answer 1 of 6 · Question 1 part b · 2 marks

2025 JUN · Paper 02 · extract 2 of 2 · find part b in this mark scheme extract

Question Number	Answer	Mark
1(e)	**One** mark for giving one way the findings support the conclusion. For example: • More than twice as many participants disobeyed the instruction to be silent when the man was wearing a jeans and t shirt than when the man was wearing a uniform. Accept any other appropriate answer.	**(1)**

Type MS · Extraneous variables and how to control them

Answer 2 of 6 · Question 3 part c · 2 marks

2020 NOV · Paper 02 · extract 1 of 3 · find part c in this mark scheme extract

Question number	Answer	Mark
3(a)	**One** mark for correct knowledge of a feature of a laboratory experiment For example: • A laboratory experiment takes place in an artificial environment for the participants (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
3(b)	**One** mark for knowledge of sampling method **One** mark for application to the scenario For example: • A volunteer sample is where people offer to take part in a piece of research (1), so Becca could advertise her experiment and ask for males and females to sign up to take part (1). Accept any other appropriate response	(2)

Type MS · Extraneous variables and how to control them

Answer 2 of 6 · Question 3 part c · 2 marks

2020 NOV · Paper 02 · extract 2 of 3 · find part c in this mark scheme extract

Question number	Answer	Mark
3(c)	**One** mark for knowledge of single-blind technique. **One** mark for application to the scenario. • A single-blind technique hides the true aim of the study from the participants taking part (1) so that the males do not change their behaviour and try harder on the coordination task (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
3(d)	**One** mark for correct answer. Calculation: 30:25 simplified using common factor 30/5:25/5 • 6:5 Reject all other answers.	(1)

Question number	Answer	Mark
3(e)	**One** mark for calculating the difference. **One** mark for answer to two significant figures. • 63.51-57.24=6.27 (1) • 6.3 (1) Accept any other appropriate response.	(2)

Question number	Answer	Mark
3(f)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. • Females are better at word-meaning tasks than males (1) as the female participants were 12.15 seconds quicker than the male participants at this task (1). Accept any other appropriate response.	(2)

Type MS · Extraneous variables and how to control them

Answer 2 of 6 · Question 3 part c · 2 marks

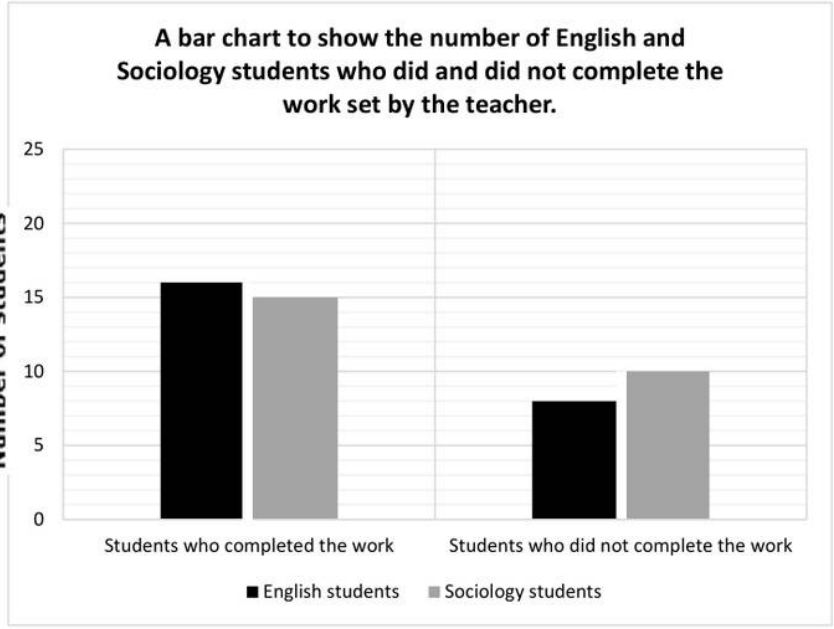

2020 NOV · Paper 02 · extract 3 of 3 · find part c in this mark scheme extract

Type MS · Extraneous variables and how to control them

Answer 3 of 6 · Question 4 part d · 1 mark

2020 NOV · Paper 02 · extract 1 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
4(a)	**One** mark for calculation of totals for students. **One** mark for calculation of percentage of students who completed the work set. • 16+15+8+10= 49 • (31/49)*100 = 63.27% Accept any other appropriate response.	(2)

Question number	Answer	Mark
4(b)	**One** mark for labelling of y-axis **One** mark for plotting bar for sociology students who did complete the work. **One** mark for plotting bar for sociology students who did not complete the work set.  Accept any other appropriate response.	(3)

Type MS · Extraneous variables and how to control them

Answer 3 of 6 · Question 4 part d · 1 mark

2020 NOV · Paper 02 · extract 2 of 3 · find part d in this mark scheme extract

Question number	Answer	Mark
4(c)	**One** mark for giving one way findings support conclusion. For example: • There was only one more English student that completed the work compared to Sociology students (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
4(d)	**One** mark for giving a participant variable. • Ricky could have made sure that the students participating were from the same school year group (1). Accept any other appropriate response.	(1)

Type MS · Extraneous variables and how to control them

Answer 3 of 6 · Question 4 part d · 1 mark

2020 NOV · Paper 02 · extract 3 of 3 · find part d in this mark scheme extract

Type MS · Extraneous variables and how to control them

Answer 4 of 6 · Question 1 part b · 2 marks

2022 JUN · Paper 02 · extract 1 of 2 · find part b in this mark scheme extract

Question number	Answer	Mark
1(a)	C – Quantitative data **The only correct answer is C** A is incorrect as the data is numerical B is incorrect as the data is objective D is incorrect as the data is primary	(1)

Question number	Answer	Mark
1(b)	**One** mark for each appropriate way to standardise the procedure (maximum **two** marks). For example: • Andrew could use the same trigrams for each participant (1) • Andrew could show the trigrams to participants for the same amount of time (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(c)	**One** mark for correct calculation of male participants. **One** mark for correct answer. Calculation: 20/4= • 5 males Calculation: 5:15 simplified using a common factor • 1:3 Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(d)	**One** mark for calculation of total number of participants. **One** mark for calculation of percentage. • 3+8 = 11 • (11/20)*100 = 55% Accept any other appropriate response	(2)
Question number	**Answer**	**Mark**

Type MS · Extraneous variables and how to control them

Answer 4 of 6 · Question 1 part b · 2 marks

2022 JUN · Paper 02 · extract 2 of 2 · find part b in this mark scheme extract

1(e)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. • The capacity of short-term memory is between 5 and 12 items (1) as 90% of participants correctly recalled between 5 and 12 of the trigrams they were shown (1). Accept any other appropriate response.	**(2)**

Type MS · Extraneous variables and how to control them

Answer 5 of 6 · Question 2 part c · 2 marks

2023 JUN · Paper 02 · extract 1 of 2 · find part c in this mark scheme extract

Question number	Answer	Mark
2(a)	**One** mark for understanding of observation research method. **One** mark for application to the scenario. • An observation research method can allow a researcher to record naturally occurring behaviour in a situation (1) so Kamira will be able to record how the different people actually respond to someone else's property that has been lost in a realistic way (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
2(b)	**One** mark for drawing an appropriate table structure. **One** mark for appropriate column headings. **One** mark for appropriate row headings. For example: **Behaviour of passers-by** / **Tally** / **Frequency** **Ignored the item** **Gave the item to staff** **Took the item** Accept any other appropriate response.	(3)

Question number	Answer	Mark
2(c)	**One** mark for understanding of a situational variable. **One** mark for application to the scenario. • A situational variable is a variable created from the context or environment in which a study takes place that can affect the results (1) so Kamira may have considered the location of the observation so that she was not near the security office which may change the likelihood of returning the item (1). Accept any other appropriate response.	(2)

Type MS · Extraneous variables and how to control them

Answer 5 of 6 · Question 2 part c · 2 marks

2023 JUN · Paper 02 · extract 2 of 2 · find part c in this mark scheme extract

Type MS · Extraneous variables and how to control them

Answer 6 of 6 · Question 2 part b · 1 mark

2025 JUN · Paper 02 · extract 1 of 2 · find part b in this mark scheme extract

Question Number	Answer	Mark
2(a)	**One** mark for understanding of an opportunity sampling technique. **One** mark for appropriate application to the scenario. For example • Opportunity sampling is where participants are selected based upon their availability at the time (1), so Jenna could stand outside a lecture room and ask students who exit if they are willing to participate in her research on the effect of stress on memory (1). Accept any other appropriate response.	**(2)**

Question Number	Answer	Mark
2(b)	**One** mark for identification of the correct experimental research design. • Repeated measures as all participants were tested before and after their examinations. Accept any other appropriate response.	**(1)**

Question Number	Answer	Mark
2(c)	**One** mark for correct calculation of the mean. Calculation: 5+6+7+4+5+3+9+10+6+5=60/10 • 6 Reject all other answers.	**(1)**

Type MS · Extraneous variables and how to control them

Answer 6 of 6 · Question 2 part b · 1 mark

2025 JUN · Paper 02 · extract 2 of 2 · find part b in this mark scheme extract

Question Number	Answer	Mark
2(d)	**One** mark for correct rank ordering. **One** mark for correct answer. • Rank ordering: 6,7,7,7, 8, 8, 8, 9, 9, 11 • (8+8)/2 = 8 Accept any other appropriate response.	**(2)**
