Type MS · Spotting the IV and the DV

Answer 1 of 4 · Question 1 part a · 1 mark

2025 JUN · Paper 02 · extract 1 of 2 · find part a in this mark scheme extract

Question Number	Answer	Mark
1(a)	**The only correct answer is C -** *The number of participants who obeyed the man `s instruction to remain silent.* A is incorrect as this is the independent variable. B is incorrect as this is a control measure. D is incorrect as this is not the dependent variable.	**(1)**

Question Number	Answer	Mark
1(b)	**One** mark for understanding of a participant variable. **One** mark for application to the scenario. For example: • A participant variable is any characteristic of a person that could affect the study's results, other than the independent variable (1) for example, Thomas may have considered the gender of his sample as one gender/age may naturally be more obedient than the other (1). Accept any other appropriate response.	**(2)**

Question Number	Answer	Mark
1(c)	**One** mark for calculation of total number of participants. **One** mark for calculation of percentage. 22+11+8+19 = 60 (33/60)*100 = 55% Accept any other appropriate response.	**(2)**

Question Number	Answer	Mark
1(d)	**One** mark for calculation of total number of participants who disobeyed. **One** mark for correct answer. Calculation: • 8 + 19 = 27 Calculation: 27:60 simplified using a common factor • 9:20 Accept any other appropriate response.	**(2)**

Answer 1 of 4 · Question 1 part a · 1 mark

2025 JUN · Paper 02 · extract 2 of 2 · find part a in this mark scheme extract

Question Number	Answer	Mark
1(e)	**One** mark for giving one way the findings support the conclusion. For example: • More than twice as many participants disobeyed the instruction to be silent when the man was wearing a jeans and t shirt than when the man was wearing a uniform. Accept any other appropriate answer.	**(1)**

Type MS · Spotting the IV and the DV

Answer 2 of 4 · Question 2 part a · 1 mark

2019 JUN · Paper 02 · find part a in this mark scheme extract

Question number	Answer	Mark
2(a)	**One** mark for naming the independent variable. • The gender (male and female) of the participants (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
2(b)	**One** mark for calculation of totals for all participants and male participants **One** mark for correct calculation of males as a fraction of all participants. • Total participants =48 and total males =18 (1) • $\frac{18}{48}$ simplified 18/6 and 48/6 = $\frac{3}{8}$ (1) Reject all other answers.	(2)

Question number	Answer	Mark
2(c)	**One** mark for a reason given • The data shows that over twice as many females took the mobile phone to the police station than males (1). Accept any other appropriate response.	(1)

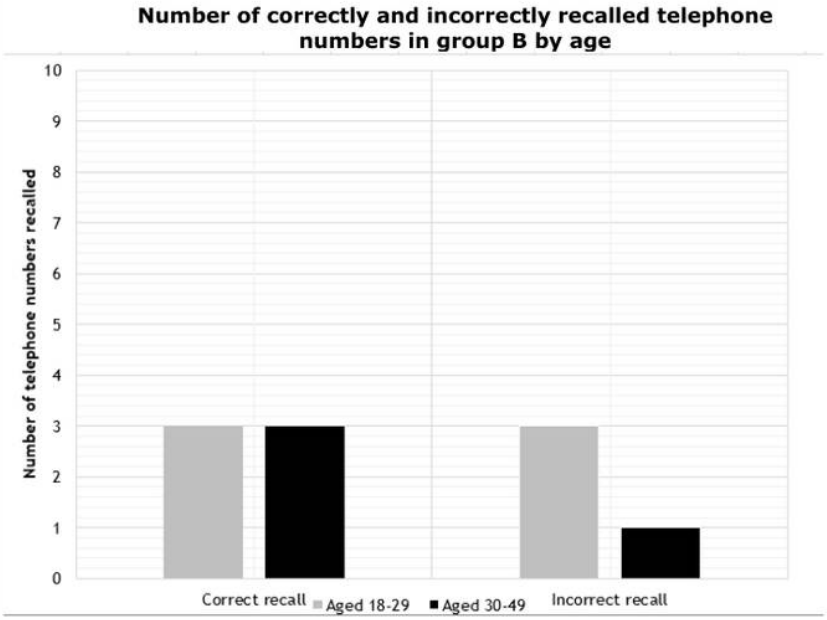

Type MS · Spotting the IV and the DV

Answer 3 of 4 · Question 5 part a · 1 mark

2021 NOV · Paper 02 · extract 1 of 2 · find part a in this mark scheme extract

Question number	Answer	Mark
5(a)	**One** mark for identifying the independent variable For example: • Whole or grouped telephone numbers (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
5(b)	**One** mark for reason given. • Group B correctly recalled twice as many telephone numbers compared to Group A (1). Accept any other appropriate response.	(1)

Question number	Answer	Mark
5(c)	**One** mark for labelling of y-axis **One** mark for plotting bar for correct recall of participants aged 30-49. **One** mark for plotting bar for incorrect recall of participants aged 30-49.  Accept any other appropriate response.	(3)

Answer 3 of 4 · Question 5 part a · 1 mark

2021 NOV · Paper 02 · extract 2 of 2 · find part a in this mark scheme extract

Type MS · Spotting the IV and the DV

Answer 4 of 4 · Question 1 part a · 1 mark

2023 JUN · Paper 02 · extract 1 of 3 · find part a in this mark scheme extract

Question number	Answer	Mark
1(a)	B – gender **The only correct answer is B** A is incorrect as this is not the independent variable. C is incorrect as this is not the independent variable. D is incorrect as this is not the independent variable.	(1)

Question number	Answer	Mark
1(b)	**One** mark for each correct ethical issue given (maximum **two** marks) For example: • Informed consent can be gained by explaining the study to parents when asking if the children can take part (1). • Gary could use pseudonyms for the children to make sure none of them could be identified from his research (1). Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(c)	**One** mark for calculation of total number of participants. **One** mark for calculation of percentage. • 50+50 = 100 • (25/100)*100 = 25% Accept any other appropriate response.	(2)

Question number	Answer	Mark
1(d)	**One** mark for correct calculation. Calculation: 32-24 • 8 Accept any other appropriate response.	(1)

Type MS · Spotting the IV and the DV

Answer 4 of 4 · Question 1 part a · 1 mark

2023 JUN · Paper 02 · extract 2 of 3 · find part a in this mark scheme extract

Question number	Answer	Mark
1(e)	**One** mark for correct calculation of number of children.	(2)
	One mark for correct answer. Calculation: • 32+24= 56 Calculation: 56:100 simplified using a common factor • 14:25 Accept any other appropriate response.	

Question number	Answer	Mark
1(f)	**One** mark for conclusion made. **One** mark for justification of conclusion through analysis of data. • At six years old, girls can conserve number more accurately than boys (1) as more than twice as many girls than boys identified that the rows contained the same number of buttons (1). Accept any other appropriate response.	(2)
