# Practice workbook · Questionnaires and interviews

Structured, semi-structured and unstructured interviews and open or closed questionnaire items.

7 question parts: 1 worked-example retry and 6 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

# 1. Question 5 · part whole · 12 marks

2025 JUN · Paper 02

Worked-example retry · Attempt part whole only.

***5** Schaffer and Emerson (1964) conducted interviews with the mothers of 37 infants. The interviews took place at four-weekly intervals, in their family home, over a period of 12 months.

The interviews were unstructured and used open-ended questions to gather information about an infant's reaction to physical contact with their mother. The behaviours the researchers focused on included:

- how the infant reacted when cuddled on their mother's knee
- whether the infant tried to get physical contact
- whether the infant avoided physical contact
- the mother's reaction to the infant's contact behaviours.

Mothers were encouraged to give full descriptions of their infant's behaviours. Often mothers would provide demonstrations of the behaviours that they had highlighted previously, without being asked.

Schaffer and Emerson (1964) found two groups of infants, which they named 'Cuddlers' and 'Non-cuddlers', with typical responses including 'loves being handled' or 'restless until put back in cot'.

Evaluate the use of unstructured interviews to investigate human behaviour. **(12)**

**1** Matthew investigated the effectiveness of drug treatment for patients with depression. He interviewed six patients from a local mental health service provider before and after drug treatment.

Matthew only used preset questions in his interview.

(a) Identify the type of interview Matthew used in his investigation.

**(1)**

- ☒ **A** Structured interview
- ☒ **B** Unstructured interview
- ☒ **C** Semi-structured interview
- ☒ **D** Covert interview

(b) Matthew made sure that the participants in his interviews had the right to withdraw.

Define what is meant by the 'right to withdraw'.

**(1)**

**1** Zak is investigating internet addiction. He designs a questionnaire that includes the following question:

How often do you use social media? Please tick one answer.

☐ Less than five times each day.
☐ Between five and ten times each day.
☐ More than ten times each day.

**Figure 1**

(a) Identify the type of question shown in **Figure 1**.

**(1)**

☒ **A** Unstructured question

☒ **B** Open-ended question

☒ **C** Closed-ended question

☒ **D** Semi-structured question

(b) State the type of data Zak will gather from his question in **Figure 1**.

**(1)**

.....

.....

(c) Zak found that nine out of fifteen participants used social media more than ten times each day.

Calculate the number of participants who used social media more than ten times each day as a fraction of all participants.

You must give your answer in the lowest form.

**(1)**

***7** Buss and Perry (1992) developed the Buss–Perry Aggression Questionnaire (BPAQ) to test levels of aggression in adults.

Participants completing the questionnaire select how far they agree with each of the 29 statements using a five-point scale. The scores for each statement are then totalled to determine aggression levels.

**Figure 1** shows example statements and the five-point scale.

| Statement | Extremely uncharacteristic | Somewhat uncharacteristic | Neither uncharacteristic nor characteristic | Somewhat characteristic | Extremely characteristic |
|---|---|---|---|---|---|
| 1. My friends say that I'm somewhat argumentative. | ✓ | | | | |
| 2. I tell my friends openly when I disagree with them. | | | | ✓ | |

(Source: adapted from Buss and Perry (1992) Buss–Perry Aggression Questionnaire)

**Figure 1**

The BPAQ can be administered online or on paper and has continued to be used to measure aggression levels in the adult population. Some researchers have also adapted the questionnaire for different countries and cultures.

Evaluate the use of questionnaires to investigate human behaviour.

**3** Juliet investigated whether there was a relationship between the number of hours spent using social media and self-rated body image scores.

Firstly, Juliet interviewed a sample of 17-year-old students using a structured interview method, where she asked them to state the length of time they spent on social media per day.

Juliet then asked the same participants to complete a questionnaire to rate how happy they were with their appearance, with a score of 0 being 'very unhappy' and 10 being 'very happy'.

(a) Define what is meant by a 'structured interview'.

**(1)**

(b) Describe how Juliet could have used a random sampling technique for her investigation.

**(2)**

(c) Identify the type of data Juliet gathered in her investigation.
